

WE'RE MAKING STRIDES IN CANCER RESEARCH WITH YOUR HELP!

Your generous support and incredible fundraising efforts enable life-changing research across Canada, which leads to better and more personalized cancer treatments and outcomes for everyone. Each year we move one step closer to a world without cancer thanks to you!

↑ **94%**

On average, 94% of children diagnosed with all childhood cancers are expected to be alive five years after their diagnosis

50% → 90%

Targeted therapies have helped to almost double the five-year survival rates for melanoma

↑ **80+%**

The five-year survival rate for certain cancers such as breast, prostate, melanoma, thyroid, testis, and hodgkin lymphoma is now over 80%

25% → 60+%

Average survival rates for all cancers combined have increased from 25% in the 1940s to over 60% today—and up to 90% in some cases

↓ **37%**

Cancer mortality is decreasing over time. Since 1988, mortality rates are down 37% in men and 22% in women.

The Terry Fox Foundation continues to be a leading national investor in cancer research, directing \$14.1 million to its programs in 2021/22. Your support is making a difference.
